

CHONA FERNANDO

Quality Engineering Analyst | Manual & Functional Testing | Test Automation (Playwright & Tosca) | AI Automation

Cebu, Philippines | marceejayfernando@gmail.com | [linkedin.com/in/cj-fernando-501828345](https://www.linkedin.com/in/cj-fernando-501828345) | github.com/marceejayfernando-ship-it

PROFESSIONAL SUMMARY

Quality Engineering Analyst with 3+ years of experience at Accenture, specializing in manual and functional testing of enterprise applications including SAP and PeopleSoft. Skilled in test case design and execution, defect tracking with Jira, and SQL-based data validation. Currently expanding into test automation through hands-on training in Playwright (TypeScript) and Tricentis Tosca, and building practical AI and business process automation projects using n8n, Claude Code, GoHighLevel, Make.com, Zapier, REST APIs, and webhooks.

CORE COMPETENCIES

Software Testing & QA: Manual Testing, Functional Testing, Regression Testing, System & Integration Testing, User Acceptance Testing (UAT), Test Case Design & Execution, Defect Reporting & Tracking, Requirements Validation

Test Automation (Hands-on Training): Playwright with TypeScript, Tricentis Tosca, Page Object Model (POM), Data-Driven Testing, Locators & Assertions, Cross-Browser Testing

Enterprise & QA Tools: SAP, PeopleSoft, Jira, SQL (Data Validation)

AI & Business Automation (Hands-on Training): n8n, Claude Code, AI Agents & Workflows, GoHighLevel (GHL), Make.com, Zapier, REST APIs, Webhooks, JSON, Prompt Engineering

PROFESSIONAL EXPERIENCE

Accenture — Quality Engineering Analyst / Software Tester *Aug 2023 – Present*

- Execute manual and functional testing for enterprise business applications, validating functionality and identifying defects across the testing lifecycle.
- Design and maintain test cases aligned to business and functional requirements to ensure consistent coverage across releases.
- Document and track defects in Jira, partnering with development and functional teams to drive timely resolution.
- Perform regression testing to confirm system stability following application changes.
- Support User Acceptance Testing (UAT) and validate business requirements with stakeholders.
- Run SQL queries for backend data validation and troubleshooting.

SAP Project — Telecommunications

- Performed functional testing of SAP-based business processes and financial/workflow transactions; reported defects and coordinated resolution with functional and development teams.

PeopleSoft Project

- Performed functional and regression testing for PeopleSoft applications; tracked defects in Jira and performed SQL-based data validation to support UAT and release validation.

TEST AUTOMATION — HANDS-ON TRAINING & PROJECTS

Playwright Automation Testing *TypeScript, Playwright*

- Building automated web tests against e-commerce applications (SauceDemo, LambdaTest E-Commerce Playground) using Playwright and TypeScript.
- Implementing the Page Object Model (POM) and data-driven testing with JSON/CSV test data for reusable, maintainable test suites.
- Practicing cross-browser execution (Chromium, Firefox, WebKit), test tagging, Codegen, debugging, and test reporting.

Tricentis Tosca Automation Training *Tosca Commander, Model-Based Test Automation*

- Completing hands-on training in model-based test automation, building Modules, TestCases, TestSteps, and ExecutionLists.
- Practicing reusable TestStepBlocks, test configuration parameters, and ActionModes (Input, Verify, Buffer, Constraint) against the Tricentis Vehicle Insurance sample application.

AI & BUSINESS AUTOMATION — HANDS-ON PROJECTS

GoHighLevel CRM Automation *GoHighLevel (GHL)*

- Hands-on training building CRM pipeline structures, appointment calendars, and booking workflows in GoHighLevel.
- Built practice solutions for Facebook lead management, sales pipelines, and automated lead follow-up.

AI & n8n Automation Projects *n8n, Claude Code, Make.com, Zapier, REST APIs, Webhooks, JSON, AI Agents*

- Built hands-on automation workflows including a Customer Support AI Agent, Outbound Lead Generation Automation, an Inbound AI Appointment Setter, a RAG Pipeline & Chatbot, and Gmail-to-Sheets/Drive lead-processing pipelines using REST APIs, webhooks, and JSON.
