PROFESSIONAL SUMMARY

Innovative AI Automation Specialist and Web Developer with a strong foundation in enterprise software testing and business process optimization. Experienced in designing intelligent workflows, integrating AI services, developing web applications, and automating repetitive business operations using modern no-code, low-code, and custom development technologies.

Passionate about transforming manual processes into scalable AI-powered solutions that improve productivity, reduce operational costs, and enhance customer experiences. Skilled in workflow orchestration, API integrations, chatbot development, web technologies, and AI-driven business automation.

CORE EXPERTISE

AI & Automation

- AI Agent Development
- Workflow Automation (n8n)
- Prompt Engineering
- AI Chatbots
- Process Automation
- OpenAI & Gemini Integration
- AI Content Generation
- Retrieval-Augmented Generation (RAG)
- API Integration
- Business Process Optimization

Databases & Cloud

- Supabase
- PostgreSQL
- Firebase
- SQL
- Cloud Integrations
- Authentication Systems

Tools & Platforms

- N8n
 - Zapier
 - Make.com
 - GitHub
 - Git
 - Jira
 - Postman
 - Canva
 - WordPress
 - Google Workspace APIs
 - Meta Developer Platform
-

FEATURED PORTFOLIO PROJECTS

AI Customer Support Agent

Tech Stack: n8n, Gemini AI, Google Docs, Meta Messenger API

- Developed an AI-powered customer support system capable of handling customer inquiries automatically.
- Connected AI knowledge base with Google Docs for dynamic response generation.
- Automated conversation workflows and customer support escalation.
- Reduced manual response workload through intelligent automation.

AI Content Creation Workflow

Tech Stack: n8n, Gemini, AI Image APIs

- Built an automated content generation system for social media and YouTube.
- Generated titles, descriptions, hashtags, scripts, and AI-generated visuals.
- Streamlined content production workflow from idea generation to publishing.

Business Process Automation Platform

Tech Stack: n8n, Webhooks, APIs, PostgreSQL

- Designed automated workflows for lead management, notifications, reporting, and customer engagement.
- Integrated multiple third-party services through REST APIs.
- Eliminated repetitive manual processes and improved operational efficiency.

Portfolio Web Application

Tech Stack: React.js, JavaScript, CSS, Supabase

- Developed a responsive portfolio website showcasing AI automation solutions and development projects.
 - Implemented contact forms, project galleries, and API-powered features.
 - Optimized user experience and performance across desktop and mobile devices.
-

PROFESSIONAL EXPERIENCE

Accenture

Software Tester / Quality Assurance Analyst

2023 – Present

- Conduct functional, regression, and integration testing for enterprise applications.
 - Validate business processes within SAP and PeopleSoft environments.
 - Create and execute test cases, identify defects, and collaborate with development teams.
 - Utilize SQL for data validation and system verification.
 - Support quality assurance initiatives that improve software reliability and business operations.
-

TECHNICAL PROJECT HIGHLIGHTS

- AI-powered Messenger Chatbot
- AI Lead Generation System
- Automated Email Marketing Workflow
- YouTube Content Automation Engine
- AI Social Media Content Generator
- Customer Inquiry Automation Platform
- API Integration Hub
- Workflow Monitoring Dashboard

EDUCATION

Bachelor's Degree
Bachelor of Science in Mechanical Engineering

CERTIFICATIONS

- Generative AI Fundamentals
 - Prompt Engineering
 - AI Automation with n8n, zapier & make.com
 - Software Testing Fundamentals
 - Agile Methodology
 - API Integration & Automation
-

PERSONAL BRAND

Mission

To help businesses leverage Artificial Intelligence and Automation to eliminate repetitive work, increase efficiency, and accelerate growth through innovative digital solutions.

Specialization

Building AI-powered systems that connect people, data, and technology through intelligent automation.

SERVICES

- ✓ AI Workflow Automation
- ✓ AI Chatbot Development
- ✓ Custom Web Development
- ✓ API Integration
- ✓ Business Process Automation
- ✓ AI Content Automation
- ✓ CRM Automation
- ✓ No-Code & Low-Code Solutions

"Transforming Business Processes Into Intelligent Systems."
